ADVENTURES IN SOCIAL RESEARCH: Data Analysis Using IBM® SPSS® Statistics SEVENTH EDITION
Earl Babbie, Chapman University • Fred S. Halley, State University of New York, Brockport • William E. Wagner, III, California State University, Channel Islands • Jeannine Zaino, Iona College

This Seventh Edition guides students step-by-step through the process of data analysis using SPSS®/PASW Statistics and 2008 General Social Survey data. Written by esteemed social science research authors, this workbook encourages students to practice SPSS as they read about it and provides a practical, hands-on introduction to conceptualization, measurement, and association through active learning. Arranged to parallel most introductory research methods texts, this text starts with an introduction to computerized data analysis and the social research process, then walks readers step-by-step through univariate, bivariate, and multivariate analysis using SPSS Statistics.

PAPERBACK ISBN: 978-1-4129-8244-3 • ©2011 • 456 PAGES • CourseSmart

CONSTRUCTING SOCIAL RESEARCH: The Unity and Diversity of Method SECOND EDITION
Charles C. Ragin, University of Arizona • Lisa M. Amoroso, Dominican University

This text is a concise, innovative text designed for undergraduate Research Methods courses in the Social Sciences. This Sociology for a New Century Series text effectively highlights the unity and diversity of methods across disciplines and cultures using comparative and historical examples. Ragin and Amoroso clearly demonstrate the similarities among three major traditions: qualitative research on commonalities, comparative research on diversity, and quantitative research on relationships among variables. Together, these three compelling research strategies provide a solid foundation for studying all social phenomena, from examining the complexities of everyday life to investigating the power of transnational processes.

PAPERBACK ISBN: 978-1-4129-6018-2 • ©2011 • 248 PAGES • CourseSmart

MODELS FOR SOCIAL NETWORKS WITH STATISTICAL APPLICATIONS
Suraj Bandyopadhyay, Indian Statistical Institute • A. R. Rao, Indian Statistical Institute • Bikas K. Sinha, Indian Statistical Institute

Written by a sociologist, a graph theorist, and a statistician, this title provides social network analysts and students with a solid statistical foundation from which to analyze network data. Clearly demonstrates how graph-theoretic and statistical techniques can be employed to study some important parameters of global social networks. The authors use real-life village-level social networks to illustrate the practicalities, potentials, and constraints of social network analysis ("SNA"). They also offer relevant sampling and inferential aspects of the techniques while dealing with potentially large networks.

CONTENTS 1. Introduction to Social Network Analysis / 2. Introduction to Duality / 3. Graph-Theoretic and Statistical Models / 4. Validation of Statistical Models / 5. Graph-theoretic and Statistical Measures and Methods / 6. Graph-theoretic Case Studies / 7. Sampling and Inference in a Social Network

READING AND UNDERSTANDING RESEARCH THIRD EDITION
Lawrence F. Locke, University of Massachusetts at Amherst • Stephen J. Silverman, Teachers College, Columbia University • Wayne Wyrick, University of Texas at Austin

Ideal for students, novice researchers, or professionals, this indispensable resource serves as a road map for readers who need to analyze and apply research findings. It helps them think critically about the credibility of what they are reading by showing them how to identify problems and develop constructive questions.
